

Hygiene Wish List

CASA Nashville warmly extends support to youth in residential facilities by offering essential hygiene products. Many of these young individuals lack access to quality hygiene items or, in some instances, have no access at all. This is especially impactful for BIPOC youth who may only receive standard issue hygiene products, often resulting in challenges like dry skin and damaged scalps. We firmly believe that every child deserves access to fundamental hygiene, and we're passionate about breaking down any barriers that might prevent them from receiving the specific items they need. In collecting these items, you can support our advocates in ensuring that no cost stands in the way of providing these essentials to the youth in residential facilities.

Body Washes-

Deodorant
